

Capability Statement

Specialist Access

The UK's fastest growing rope access provider of inspection and maintenance services, as a member of the International Rope Access Trade Association (IRATA), we offer safe and effective solutions to your working at height and confined space requirements.

Industrial rope access is a safe and effective alternative to scaffolding. Rope access methods can be implemented with minimal impact on other operations. Through careful planning of each project prior to the commencement of works being carried out, we can ensure a safe system of work.

- ✓ **Painting and blasting**
- ✓ **Cladding**
- ✓ **Insulation & fire proofing**
- ✓ **Industrial cleaning**
- ✓ **At height surveys**
- ✓ **NDT services**
- ✓ **Electrical installations**
- ✓ **Rigging & steel erecting**
- ✓ **Destruct services**
- ✓ **Confined space entry & rescue**

Vegetation Management

Bringing decades of experience to the table, our time-served and fully qualified arborists and vegetation management operatives support the leading names in rail, undertaking an extensive range of vegetation services across the UK rail infrastructure.

LANTRA and NPTC qualified and operating under robust safe systems of work, where necessary they're also supported by our in-house IRATA-certified rope access teams, performing their work in otherwise hazardous or inaccessible environments.
